Mission

Providing customized surgical equipment to individual surgeons for the improvement of surgical outcomes since 2004.

Current Products

1. Medial Subacromial Suture Passer

- Allows for a medial approach for rotator cuff surgery
- Perfect angle, shape and length to allow easy access to the proximal stump of a torn rotator cuff
- The cobra-like shape allows for the pickup and delivery of the proximal rotator cuff tendon while the sharp tip can penetrate the rotator cuff to allow suture delivery
- Successful use in 140 consecutive cases was presented at the International Society of Arthroplasty, Knee Surgery and Orthopaedic Sports Medicine
